Bachelor of Music (Opera)
2016

Elizabeth Harris

FRONT-END WEB DEVELOPER

ABOUT ME

I am a front-end web developer with experience building web applications using HTML, CSS, Javascript, React, Firebase and API integrations. I leverage my experience in both design and the performing arts to foster collaborative relationships and remain adaptable and curious while finding innovative solutions.

PROJECTS

CAPTURED HTML 5 | CSS | SCSS

A pixel-perfect, multi-page, fully responsive site, created from a client PSD and design guide.

TAROT APP HTML 5 | CSS | Javascript | RESTful API |

Users can either return a random card or select a specific card from the drop down. Using a REST API, the user is returned an image and description of the card, with the option to expand the description to include more information.

NOT SO SOCIAL PLANNER HTML 5 | CSS | React | RESTful API | Firebase

Our team used both Firebase and a REST API to create a social calendar that allows you to swap brunch with your friends for a TV marathon. The user can add and remove events, and add TV shows to a Favourites list to view later.

EXPERIENCE

WEB/GRAPHIC DESIGN FREELANCER

MAY 2020 - PRESENT

I work with small business owners, from ideation to implementation and launch, to build websites and design assets using a content-first strategy that speaks to their ideal client. I leverage my HTML and CSS skills to give each client a fully-customized, yet low barrier option for their website, in an intensive 2 week format.

Includes brand & marketing strategy (including SEO), copywriting, wireframing, content curation and post-launch support.

FREELANCE MUSICIAN

2012 - PRESENT

As an opera singer, I combined meticulous preparation with the ability to think on my feet in collaborations with others.
